CHAD'S STORY

On the afternoon of March 29, 2005, tragedy struck 17 year old Chad Barcia while playing in a Rugby match. As he returned from a play, he fell to the ground and died. Sudden cardiac death had claimed another young athlete.

Chad was six foot four and three-hundred eight pounds. Chad was the picture of health with no medical problems. He had NO warning signs and NO symptoms that he suffered from a "silent" heart disease that tragically claimed his life. He was a typical young adult looking forward to a successful future. Chad was a happy go lucky child who was always smiling and ready to lend a hand. He had a heart of GOLD.

Let Chad's tragedy be an eye opener that, YES this can happen to YOUR child, YOUR family.

Please join forces with us and help spread the word.

OUR MISSION

The mission of Chad's Foundation is three-fold. It is to identify, secure and provide more in-depth health screening of students participating in athletic activities at school; to ensure a defibrillator is available for all school functions and to provide enhanced safety protection gear for all students playing in sports at the school.

OUR GOAL

The goal of Chad's Foundation is to try and keep other parents from suffering the loss of their child from impairments that, possibly, could have been identified by medical tests not currently performed in school physicals.
